

280 Gymleco Smith Machine

200 series Cable and Smith machines

Gymleco's 280 is a compact and versatile Smith machine with a low overall height, making it suitable for gyms where space is limited.

Its lower locking positions allow deadlifts to be performed directly from the floor and provide additional racking options for exercises such as hip thrusts. The compact design also leaves room for step-ups and includes eight integrated weight storage positions. The machine is prepared for optional mirror installation.

- Standard frame color: Black
- Withstand high loads without restriction
- Possible to do step ups.
- Possible to do Deadlifts from the floor directly.
- Readiness for optional mirror assembling
- Totally 8 weight storage places.
